Summary

Backend-focused Software Engineer with 4 years of production experience designing and shipping microservices with Java, Spring Boot, and Kafka. Delivered high-performance REST APIs and optimized SQL query execution across production systems. Full ownership across requirement gathering, API design, deployment, and performance tuning in Agile teams. Hands-on with Docker, Kubernetes, Resilience4j, and event-driven architecture for scalable, fault-tolerant systems.

Technical Skills

- **Languages & Frameworks:** Java, J2EE, Spring Boot, Spring MVC, Hibernate/JPA
- **Architecture & APIs:** Microservices, Domain-Driven Design (DDD), RESTful APIs, Event-Driven Architecture
- **Messaging & Streaming:** Apache Kafka
- **Databases:** MySQL, Relational Database Design, Query Optimization
- **DevOps & Cloud:** Docker, Kubernetes, Jenkins, Git, GitHub
- **Frontend:** Angular, HTML, CSS, JavaScript
- **Testing & Quality:** JUnit, Postman, Peer Code Reviews
- **IDEs:** IntelliJ IDEA, VS Code, Eclipse

Experience

Sensei Technologies Pvt. Ltd. — Software Engineer

July 2022 – Present

Bangalore, India

- Designed and developed RESTful APIs following industry best practices, optimizing server-side logic and reducing page load latency for end users.
- Improved SQL query performance through indexing strategies, query restructuring, and efficient schema design in MySQL.
- Architected and implemented microservices using Spring Boot, enabling independent deployment of 5+ services and improving system scalability and fault isolation.
- Applied Resilience4j (Circuit Breaker, Retry) patterns to critical service calls, preventing cascading failures and improving fault tolerance under load.
- Integrated Kafka for asynchronous, event-driven communication between services, decoupling workflows and improving system resilience under load.
- Containerized services using Docker and deployed on Kubernetes, streamlining release cycles and improving environment consistency across dev, staging, and production.
- Designed scalable relational database schemas aligned with business requirements, reducing data redundancy and improving retrieval efficiency across key modules.
- Collaborated in Agile/Scrum sprints and conducted peer code reviews, reducing technical debt and ensuring on-time delivery across multiple quarters.

Sensei Technologies Pvt. Ltd. — Software Engineer Intern

March 2022 – June 2022

Bangalore, India

- Built and integrated RESTful APIs and developed UI components (HTML, CSS, JavaScript) integrated with backend services, gaining hands-on experience with Hibernate/JPA and relational databases.

Certifications

- Master Microservices with Spring Boot, Docker, Kubernetes – Udemy

Education

The Oxford College of Engineering

August 2017 – June 2021

Bachelor of Engineering in Mechanical Engineering – Bengaluru, India
